Practical 1

Roll No. : 45	Name: Raj Upadhyay
Class : SYBSC IT	Batch : Ist
Date of Assignment : 15/07/2026	Date/Time of Submission : 15/07/2026

Practical 1

A farmer wants a program to perform basic calculations related to farming.

The program should:

- Display the farmer's profile.
- Add the weights of two harvested crops.
- Find the square root of the total harvested area.
- Calculate the area of a triangular field.
- Swap the quantities of two fertilizer bags if entered in the wrong order.

Code:

```
>>> print("-----Profile-----")
...
... print("Farmer Name : Raj")
... print("Village : Green Village")
... print("Farm : 9 Acres")
...
... c1 = int(input("Enter the weight of first crop : "))
... c2 = int(input("Enter the weight of second crop : "))
... total = c1 + c2
... print("Total Weight =", total, "kg")
...
...
... import math
... area = int(input("Enter the total harvested area : "))
... print("Square Root =", math.sqrt(area))
...
...
... base = int(input("Enter the base : "))
... height = int(input("Enter the height : "))
... area = 0.5 * base * height
... print("Area of Triangle =", area)
...
...
...
... bag1 = int(input("Enter the quantity of first fertilizer bag : "))
... bag2 = int(input("Enter the quantity of second fertilizer bag : "))
... temp = bag1
... bag1 = bag2
... bag2 = temp
...
... print("Swaping of Fertilizer Bags =", bag1, bag2)
... print("Raj_45")
...
```

Output :

```
-----Profile-----  
Farmer Name : Raj  
Village : Green Village  
Farm : 9 Acres  
Enter the weight of first crop : 10  
Enter the weight of second crop : 18  
Total Weight = 28 kg  
Enter the total harvested area : 5  
Square Root = 2.23606797749979  
Enter the base : 20  
Enter the height : 18  
Area of Triangle = 180.0  
Enter the quantity of first fertilizer bag : 9  
Enter the quantity of second fertilizer bag : 18  
Swaping of Fertilizer Bags = 18 9
